In Figure 5. of the drawings, reference "16" has no lead line. Appropriate correction is required.

Claims 1-9 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation "pull strip member supported on said base member and guided thereon for longitudinal sliding movement INDEPENDENTLY of said pusher sled" is not understood. It would appear from the drawings and the specification that the pull strip is inherently connected to the pusher sled and therefore cannot move independently from it.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 12, 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dumontet 6,527,127. Note base 30, pusher sled 4, pull strip member 10, return spring 80.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other dispensing and display racks are illustrated by Chesley 3,308,961; Crum 4,907,707; Stavros 6,666,533; Rankin, VI 6,464,089; Crum 5,012,936.
